

LABORATORY TEST REPORT

CONFIDENTIAL — FOR PATIENT USE ONLY

Patient Name:	Muna Okoli	Report No:	RPT-BC-20260609-001
Date of Birth:	14 March 1992	Test Ordered:	Blood Culture
Gender:	Female	Order Date:	07 Jun 2026
Patient ID:	PT-2026-00847	Result Date:	09 Jun 2026
Contact:	+234 812 345 6789	Verified By:	Dr. A. Okonkwo, FRCPath

SPECIMEN DETAILS

Specimen Type	Collection Date	Collection Time	Specimen ID	Condition
Blood (Venous)	07 Jun 2026	08:32 AM	SP-2026-03821	Satisfactory

TEST RESULTS

Test	Result	Reference Range	Units	Flag
Blood Culture (Aerobic)	No Growth Detected	No Growth	—	
Blood Culture (Anaerobic)	No Growth Detected	No Growth	—	
Haemoglobin (Hb)	11.2	12.0 – 16.0	g/dL	L
White Blood Cell Count	11.8	4.0 – 11.0	x10 ⁹ /L	H
Neutrophils	78	40 – 75	%	H
Lymphocytes	16	20 – 45	%	L
Platelets	224	150 – 400	x10 ⁹ /L	
C-Reactive Protein (CRP)	48.3	< 5.0	mg/L	H
Erythrocyte Sed. Rate	34	0 – 20	mm/hr	H

Flag Key: H = Above normal range L = Below normal range

CLINICAL INTERPRETATION

Blood cultures from both aerobic and anaerobic bottles show **no growth after 5 days of incubation**, indicating no evidence of bacteraemia or fungaemia at this time. However, the full blood count reveals a **leucocytosis with neutrophilia** (WBC 11.8 x10⁹/L, Neutrophils 78%), alongside a significantly **elevated CRP of 48.3 mg/L** and raised ESR, which are consistent with an active inflammatory or infectious process. Mild anaemia (Hb 11.2 g/dL) is also noted. These findings should be correlated with the patient's clinical presentation. Repeat cultures and further imaging may be warranted if symptoms persist.

AUTHORISATION

Verified By:	Dr. Adaeze Okonkwo	Date Verified:	09 Jun 2026, 11:47 AM
Qualification:	FRCPATH, FMLSCN	Lab Ref No:	LIMS-LAB-00294
Signature:	_____	Lab Director:	Prof. E. Balogun, PhD
